Ordering from MOSS

WHEN ORDERING...

Remember, supplying details of your car, (i.e: engine, commission or VIN, LHD / RHD, year and any modifications) will save time and help us process your order correctly. We will be pleased to provide a full parts quotation, detailing price, availability and shipping costs, upon request.

SHIPPING & DISPATCH

Orders for delivery in the UK may be dispatched by regular post for small/lightweight items, larger items may be dispatched via a courier. Please call us for the best delivery option for your order and the latest delivery prices.

For delivery outside the UK we offer the following services. Economy delivery (by road): 2 to 5 days (approximately). Express delivery (by air): 1 to 2 days (Guaranteed). For small and low value orders we also use airmail. For these services, please ask for prices and the best delivery option when you place your order. Most deliveries (except airmail) are 'trackable', (inc: e-mail updates and internet access for selected carriers). Please remember, all carriage charges are dependent on either gross weight or volumetric weight, whichever is greater. If a quotation is required prior to placing your order, please contact a member of the sales department. Alternatively, you can arrange your own collection.

UK OPENING TIMES

Open Monday to Friday

9.00am to 5.30pm

Saturday

9.00am to 1.00pm

(Closed Sunday & Bank Holidays)

See website for Paris opening times

COLLECT FROM BRANCH

Why not reserve and collect your order from one of our branches?

ONLINE

If ordering online select the 'collect from branch/ arrange own pick up' option on the 'Delivery Method' page during checkout. Then select the branch you want to collect your order from. You will receive an email confirming your order and selected branch.

EMAIL

Send an email to sales@moss-europe.co.uk with the title of "Branch Collection". Your e-mail must contain the following information: Your full name, address, daytime contact number, desired branch for collection and part numbers.

COLLECTION

Our sales team will contact you when your order is ready to collect. You will then be able to collect and pay for your order at your requested branch during store open hours. On collecting your order you may be asked to confirm your address.

PRICING

Due to the volatility of world markets and currency fluctuations the prices in this catalogue are subject to change.

Moss make every attempt to keep prices competitive and stable, however in common with all other suppliers in our industry, we reserve the right to alter prices without prior notice. For the latest prices, please call or visit our website moss-europe.co.uk.

All prices are per unit (unless otherwise stated) and include (UK) VAT at 20% (where applicable). Please note EU countries may be charged at their local VAT rate, countries outside the EU will not be charged VAT. See the ordering information

or our website for further details. Prices are correct at the time of going to print, postage & packaging is not included. E&OE.

90 DAY MONEY BACK PEACE OF MIND WARRANTY

It's simple, if you change your mind for any reason, all uninstalled parts still in their original condition and packaging may be returned to us within 90 days from the date of purchase for a full refund. A copy of the original invoice or picking label must accompany the return. Return freight is paid by the customer, unless returned due to our error.

In the event of a part failing in use, all parts are warranted against defects in materials and workmanship for 12 months from the date of purchase. Please remember that all returns must be accompanied by the original invoice, return freight will be reimbursed. For more details see our website or contact your local branch.

Keep up to date with our latest news and tell us yours.

FALCON

454-508

Falcon stainless steel exhaust systems

If you want to keep the standard style of exhaust but you want the longevity of stainless steel, then we recommend using one of our Falcon high quality exhaust systems. For individual replacement components, exhaust

mountings and detailed model specifications, please see the Restoration section.

TB and TC stainless steel system454-508£264.00

One of the finest sports exhausts available...

Tourist Trophy exhaust system

This beautiful Tourist Trophy polished stainless steel sports exhaust system is available for TD & TF models and is manufactured using the highest quality materials and workmanship. The system features a single silencer with a tail pipe designed to clear the overrider. The box is packed with a combination of stainless steel wire wool and fibreglass, this gives a throaty exhaust note under acceleration that isn't intrusive when cruising.

option, provided that the muffler discloses a manufacturing defect. Warranty is void if any defects are caused by a physical impact of any kind.

- Manufactured from 1.2 mm thick 304 grade stainless steel
- Entire mid-pipe/silencer is polished to a mirror shine
- Tailpipe angled away from the overrider
- 5 Year Limited Warranty (conditions apply)

Warranty info: This system is warranted to the original purchaser of record and for the original vehicle on which the product was installed, against defects in materials and workmanship for 5 years. Moss' sole obligation under this warranty shall be limited to repair or replacement at Moss'

Exhaust tail pipe trim

If you want that true classic look for your MG exhaust, this high quality stainless steel clamshell shape tail pipe trim is just the thing, with the MG logo.

Exhaust tail pipe trim MG logo224-140£107.40

Sports coil

Sports coils are designed to improve ignition performance. They give more reliable starting power and greater performance at high revs thanks to the 40,000 volt output. Don't forget to renew your plugs and leads to optimise the power. Your HT lead into the coil will need to be the push-in type, use GLC1110 to convert the lead.

Shock absorber bush installation kit

Installing new Girling shock absorber bushes and link pins has been a great source of frustration for TA, TB, TC owners for years. Replacement bushes available over the years have been either very easy to fit, coming apart just as easily or nearly impossible to fit! Our kit includes detailed instructions.

TA and TC shock absorber bush installation kitMM385-890£66.40
--	----------------	-------------

Wheel cylinder set

The braking power of the typical T-series ranges anywhere between adequate to nightmarish. Moss now offers a complete wheel cylinder set with fantastic build quality that offers stopping performance that your vehicle hasn't seen since it was new.

Not only will your confidence increase when needing to stop, but also your budget will appreciate the cost savings that the complete kit offers over purchasing wheel cylinders individually.

Wheel cylinder set TD-TF180-628£159.40
--------------------------	--------------	--------------

Crown wheel & pinion conversion kit

This complete crown wheel and pinion conversion kit consists of all the major parts needed to convert your TD or TF to the MGA crown wheel & pinion. It should be purchased in addition to the TD-TF crown wheel & pinion interchanges manual (part no. 212-350) which offers a step-by-step guide to converting the rear axle to accept MGA or ZA-ZB crown wheel & pinion. The kit does not include parts for a normal rebuild that may be required, these will need to be purchased separately. The kit includes crown wheel & pinion, spacer, pinion bearings and CW&P nut.

Crown wheel & pinion conversion kit, 4.55:1 - TD-TF102262K£212.00
Crown wheel & pinion interchange manual - TD-TF212-350£212.00

Rear tube shock conversion kit

This telescopic damper conversion kit is designed to give improved ride and damping characteristics to your TD-TF. Featuring Koni adjustable dampers with bespoke brackets and comprehensive fitting instructions. Koni dampers are renowned for their quality and accurate damping control, dampers must be removed from the car to adjust the damping settings.

Koni rear shock conversion kit rear TD-TF267-658£404.50
---	--------------	--------------

Damper conversion kit

This front damper conversion uses MGB front dampers with specially designed and modified upper trunnions.

Please note that this replaces the shocks on Armstrong equipped TDs only, and all TF's. TD's that had Girling dampers cannot use this conversion due to clearance problems. In order to use it, the TD must have the "relief bump" in the front wing to clear the damper body. The kit comes complete with everything needed except bolts to mount the damper. Existing damper mount bolts should be retained.

Damper conversion kit TD & TF264-398£723.20
-------------------------------	--------------	--------------

TT3949

Remote brake servo kit

For those who find the brake pedal rather hard after driving more modern vehicles, these remote servo kits make braking easier by reducing pedal effort. Suitable for all single line brake circuits they are remote mounted and easily plumbed into the hydraulic and vacuum systems of the car. We offer both a Lockheed and aftermarket kit, both are supplied with mounting brackets and hardware.

- Remote brake servo kit LockheedTT3949£180.00
- Remote brake servo kit aftermarketTT3949Z£92.30

Alfin brake drum

These newly available Alfin brake drums for the TC provide extra cooling to improve the braking efficiency, reducing brake fade under heavy braking.

- TC Alfin brake drum (each)456-910£315.30

TT294021

Kenlowe fan kit

Kenlowe were the innovators of electric, thermostatically controlled engine cooling fan kits for classic cars. Their powerful fans are designed to give high air flow to aid engine cooling, particularly useful in modern traffic situations.

Fitting a Kenlowe fan will reduce the engine warm up time, prevent excessive cooling and allow the engine to operate closer to its ideal running temperature. Removal of the standard fan will help to reduce engine noise, and will help improve power/mpg. Kenlowe fan kits are recommended as replacements for the mechanical fan where the cooling system is in good condition and there are no overheating issues. Where cooling issues are present then a Kenlowe fan kit may be used as a secondary booster to assist the mechanical fan. However, we recommend that any cooling system problems are addressed and repaired as necessary.

A manual override switch is available separately, allowing the fan to be operated at any time giving maximum control of the engine's temperature. Kit includes fan, motor, thermostatic switch, wiring, mounting hardware and instructions.

- Kenlowe fan kit, 10" (blower)TT294021 . . .£148.80
- Manual override switchTT2948£11.35

H4 HALOGEN HEADLAMP CONVERSION

For a powerful superior light beam and pattern, fitting modern halogen headlamps is one of the most worthwhile upgrades you can make to your classic.

Our kits include two light units and two 60/55w halogen bulbs. You can fit standard H4 bulbs, or replace them with blue tinted, or

super white xenon. Super white xenon are approx. 30% brighter.

See page A19 for more information

Battery cut-off switches

Battery cut-off switches are a good idea for all cars. Fitting one enables you to quickly isolate the battery and immobilise the car; ideal when working on your car, or if you intend to put your car into storage. Use with a battery conditioner, see our website or our Restoration Tools catalogue.

Battery mounted cut-off switches

These cut-off switches simply mount to the battery post and feature a screw-in knob to break the circuit. Available with a bypass fuse to allow sufficient current to pass to operate clocks, alarms and coded radios, but if any attempt is made to start the car the fuse will blow.

Battery mounted cut-off switchGAC3192X£6.46
 Battery mounted cut-off switch with bypass fuse .GAC31921£9.50

In-line cut-off switches

These cut off switches need to be fitted into the main battery to starter cable. The body of the switch should be mounted securely to the car and cables fitted using the terminal kit.

Period cut-off switch

These are reproductions of the Lucas 'Battery Master Switch' which was a popular accessory on many British classics.

Period battery cut-off switch (short knob)1B2804£27.00
 Period battery cut-off switch (long knob)1B2804L£27.00

Motorsport cut-off switches

Battery cut-off switches are obligatory for competition cars and should be fitted with a cable for remote access.

Battery cut-off switchTT7964£16.85

Battery tray/liner

This clever - yet functional item, completely hides all but the most terminal symptoms of battery box plague. Ribbed for strength, this battery tray not only protects against corrosion, but also makes cleaning around the battery easier.

Battery tray/linerAM7301£35.00

CSI-Ignition distributors

CSI-Ignition distributors offer a fully electronic ignition system built into a modified Lucas 23D4 distributor housing, keeping as near as possible to the original appearance in the engine bay.

Gone are the points and condenser and mechanical advance mechanism, all replaced with a high quality electronic ignition system manufactured using military specification components for durability and reliability. These distributors are maintenance free (no points to adjust), and offer the benefits of, easier starting & smoother running, more torque & power, reduced fuel consumption & emissions. They also eliminate the weaknesses of mechanical timing advance and problems such as points bounce ensuring correct ignition timing throughout the rev range.

"The new range of CSI-Ignition distributors is a breakthrough for classic car ignition systems".

Each CSI-Ignition distributor features 16 easily switchable, optimised ignition curves to allow timing adjustment to suit your car's engine and fuel specifications. Alternative advance curves can be selected to suit your engine's state of tune making them ideal for modified engines. Curves are easily selected using a screwdriver in a rotary switch, with a bright flashing LED indicator to show the selected curve all concealed underneath the distributor cap.

The distributors are also available with an electronic immobiliser system to prevent unwanted starting of the engine. The immobiliser system features a compact receiver, which should be fitted close to the ignition switch but out of sight, and an electronic key.

All CSI-Ignition distributors for MGT Types are specially modified 23D units they feature optimised curves, without vacuum units and will suit standard and modified engines. Please note: Some units may only be available To Order. More details are available on our website, search for CSI-Ignition Distributor.

Optimised 23D4 positive earthCSD5013571 £359.30
 Optimised 23D4 negative earthCSD5013581 £359.30
 Optimised with immobiliser 23D4 positive earth .CSD5013671 £489.00
 Optimised with immobiliser 23D4 negative earth .CSD5013681 £489.00

CSI-Ignition distributors require a coil with minimum resistance of 2.5 ohms. We recommend using our sports coil TT2981 3 ohms. Bypass the ballast resistor if fitted.

Sport coil (3 ohms)TT2981£19.30

235-865

Spin-on oil filter adaptor

Upgrade your TD and TF to use a modern efficient style spin-on cartridge type oil filter. As well as offering better filtration they make oil changes a cleaner and simpler operation. Includes adaptor, seals and fittings, filter not included. Suitable for TD's from (e) 14224 and TF models.

Spin-on adaptor kit235-865£101.26
Oil filterGFE173£4.80

433-421

Crankshaft oil seal kit

This kit replaces the antiquated and inefficient threaded slinger at the rear of the engine, a source of constant and consistent oil leaks. Contrary to other conversions which are presently being sold by others, which require extensive and irreversible modifications, this kit is easily installed when the instructions are followed exactly, and requires the drilling of only one small hole.

TB-TF rear oil seal conversion433-421£180.00
TB-TF replacement seal for above433-422£42.20
TB-TF Speedi sleeve433-425£56.80

(Recommended to fit with 433-421).

Klingersil gasket

These gaskets are manufactured from a modern high performance synthetic material that can withstand much higher temperatures (up to 400°F) and extreme pressures (up to 750psi) making them ideal for fast road and competition engines.

Gasket thermostat housing updated115467X£1.03
-----------------------------------	--------------	------------

435-395

435-385

Oil filter conversion

This replacement filter assembly for the original TB-TD is a throw away type. The clever design uses inexpensive inserts making the entire package economical in the long run. Suitable for TB-TC and TD models up to (e) 14223.

Oil filter conversion435-385£126.23
Replacement oil filter435-395£8.00

Adjustable oil pressure regulator

This high quality machined period, high performance oil pressure regulator allows external adjustment of the engine oil pressure relief valve spring pre-load.

Adjustable oil pressure regulator435-550£78.80
-----------------------------------	--------------	-------------

Billet crankshaft

These are the next generation of crankshafts. Engineered in England from solid EN40B steel billets, these crankshafts provide a strong foundation for your engine. The crankshafts are machined using state of the art equipment to original MG specifications. Then the bearing journals are carefully polished before the crank is hardened and tempered to a T condition. Finally it is balanced and Nitrided to the highest quality finish.

Billet crankshaftAAA3105X	£1,670.00
-------------------	---------------	-----------

Oil cooler radiators

The oil should be allowed to operate at its optimum temperature, not too hot and not too cold. Choose the one that best suits your purposes.

10 row oil cooler radiator for road useARO9807£66.00
13 row oil cooler radiator for fast roadARA221£38.00
16 row oil cooler radiator for fast road/sprintARO9875£85.00
19 row oil cooler radiator for raceARO9888£92.70

MM235-945

Oil cooler installation kits

Oil thins as the temperature increases, thinner oil reduces oil pressure and is less effective at preventing metal to metal contact. Longer journeys or driving at sustained high speeds, tends to exacerbate the problem. Fitting an oil cooler minimises this effect and helps prevent engine damage. Our kits come with mounting brackets and unions in a variety of styles.

Thermostatic kits include a thermostat so the oil does not go through the cooler until it reaches operating temperature, giving quicker warm up. The radiator is supplied separately so you can choose the most appropriate size. TB, TC and early TD kits are for early vertically mounted oil filter applications. Late style kits incorporate a cast aluminium sandwich plate to fit between the oil pump and filter canister. Oil coolers are normally mounted below the splash apron. (Hose unions are 1/2" BSP).

TB, TC and TD (TD to engine number 14223)	..MM235-935	..£47.20
TD (engine number 14224 on) TFMM235-945	£106.40

High capacity fuel pumps

The standard fuel pump may not be able to maintain adequate fuel flow and pressure at higher engine speeds, particularly with a tuned engine. The Facet range of fuel pumps will suit all standard and modified engines fitted with carburettors. They give constant fuel flow and pressure, even at high temperatures eliminating the problems associated with vapour lock. The pumps are available in a variety of specifications to suit the engine's fuel pressure and flow requirements. Further fine tuning of the fuel pressure can be easily achieved by the use of a separate fuel regulator, see right. With safety in mind we recommend fitting a fuel pump inertia switch kit, so that in the event of an accident fuel delivery is automatically cut-off. Fuel lines may require adapting to install the new pump, check pipe sizes to select the correct unions, additional unions may be required.

Cylindrical fuel pumps

Formerly known as interrupter type pumps, these heavy duty pumps can be fitted at the front or rear of the car and up to 600mm above the bottom of the fuel tank. Kits are supplied with mounting & 8mm unions, alternative size unions available.

- Cylindrical fuel pump kit - road Silver TopTMG2930K . .£96.00
(Up to 150bhp, flow rate: 30 gal/hr, 4.0-5.50 psi, unions: 8mm x 1/8 npt)

- Fuel pressure regulator 5/16" unionsTT2926 . . .£51.00

Fuel pump inertia switch kit

This inertia switch is a good safety feature when using an electric fuel pump. The switch unit mounts to a vertical surface in the engine bay and in the unfortunate event of a crash cuts the power to the fuel pump preventing fuel spillage. Supplied with multi connector and tail leads to allow easy connections.

- Fuel pump inertia switch kitC41220AX . .£47.50

Fuel tank dipstick

A simple yet effective way of ensuring you don't run out of fuel. Calibrated with gallons on one side and car specifications on the back.

- Dipstick, TC TD & TF386-195 . . .£3.91

Moto-meter and radiator cap

This superb product for TA to TD models is not only a well made and good looking accessory, but also very important if your T-Type came out of the factory without the optional water temperature gauge. Available with a choice of plain or 'wreath' design bezels, with or without a cap.

- Moto-meter with wreath bezel and cap230-125 . .£155.30
- Moto-meter with plain bezel and cap230-130 . .£155.30
- Moto-meter with wreath bezel no cap230-103 . .£87.50
- Moto-meter with plain bezel no cap230-104 . .£90.55

MOTO-LITA STEERING WHEELS

Moto-Lita are among the finest replacement steering wheels available. Designed to enhance the appearance of the cockpit and provide an improved feel for the driver.

Available in a variety of styles, including polished or black painted spokes, with the option of polished wood or black leather rims.

Available in 13" to 15" diameters. Boss kits for each specified model of car are required for fitting (available separately).

Moto-Lita

See page A22 for more information

SPORTS EXHAUST SYSTEMS

Tourist Trophy manufacture some of the finest, most durable stainless steel exhaust systems available.

Tourist Trophy polished stainless steel exhaust systems are manufactured using the highest quality materials and workmanship.

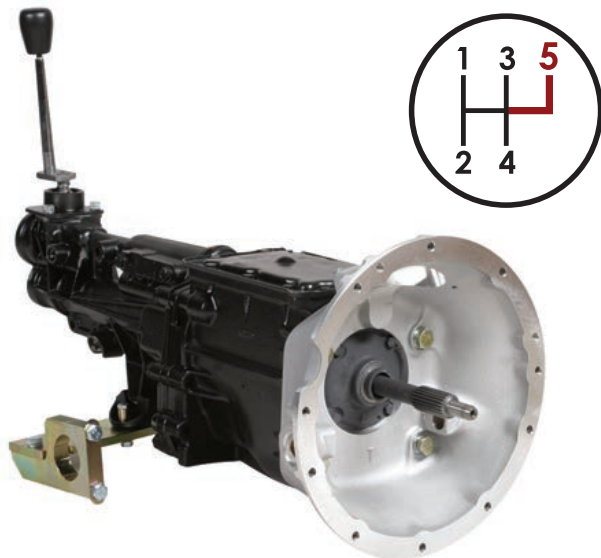

These exhausts produce a distinctive 'sporty' exhaust note. Whilst the stainless steel has a mirror polish finish that shines like chrome.

These systems provide a fantastic sound and look stunning.

- High quality manufacture
- Durable stainless steel resistant to corrosion
- Attractive polished appearance
- All systems are covered by a 5 year limited warranty.

See page A04 for more information

5 speed gearbox conversions

Our precision engineered 5 speed gearbox conversion is based on the Ford Type 9 gearbox and has been designed to make the installation as simple as possible.

The conversion kit is supplied separately to the gearbox assembly and you will need to check your clutch plate diameter before ordering. Conversion kits include a bespoke cast alloy bell housing, brackets and necessary hardware. For full specifications and separate components, please contact your nearest Moss branch or check our website for more details.

Please note: TF models also require a supplemental adaptor kit for the bumper tie bar and fan spacer modifications.

- TC RHD conversion kit 7.25" clutch041-490**£1,328.00**
- TC RHD conversion kit 8" clutch041-491**£1,298.00**

Grose jets for SU carburettors

Grose jets use a more modern ball valve so they won't stick open.

Grose jets for SU H/HS carburettors GAC9201X **£9.50**

Plain throttle discs for SU carburetors

If your throttle discs are fitted with a pop valve these should be replaced with plain discs to maximise air flow through the carburetors on full throttle.

- Plain throttle disc for HS2 WZX1320 **£16.10**
- Plain throttle disc for HS4 WZX1323 **£11.70**

Alloy rocker covers

An alloy rocker cover will improve the appearance of your engine bay and as an added advantage, will help to muffle valve train noise. Always fit a new gasket when replacing your rocker cover, and do not over tighten rocker cover nuts.

The non-finned covers for the TB, TC and TF have provision for the breather fittings to use the original air cleaners. The TD-TF finned cover has no provision for the air cleaner breather pipe. Please refer to the Restoration section for breather system.

- TB and TC non-finned cover with filler cap (MG logo) .224-225**£185.00**
- TD finned cover with filler cap (MG logo)224-226**£180.00**
- TF finned cover with filler cap (MG logo)224-245**£209.00**

- Thumb nut for T-Type rocker cover (MG logo) . .224-250**£18.45**

- TB-TC-TD and TF tappet cover plate224-240**£84.50**
(This chromed tappet cover plate will really enhance your engine bay).
- Brass bolt for tappet plate (MG logo)433-345**£24.00**
- Gasket for tappet cover plate290-600**£5.05**

MG carburettor caps and float bowl bolt

These very distinctive solid brass dashpot damper caps for SU carburetors will improve your engine compartment. Your original damper rod must be re-used and pressed into the new cap. The solid brass float bowl bolt with MG logo complements the MG logo carburettor caps.

- Carburettor caps with MG logo (pair) 370-735 **£44.20**
- Float bowl bolt (each) GAC4149X **£31.65**

Oversized shafts for SU carburetors

Worn throttle shafts and carburettor bodies cause bad idle and uneven running. This can be remedied by replacing your carburetors or by reaming out your carburettor bodies and fitting oversize throttle shafts.

- Oversize throttle shafts for HS4 WZX1177RP **£16.30**
- Carburettor reamer386-385 **£171.20**

Supercharger kit

Supercharging has a prominent place in British car history, going back as early as the 1920's. In the 1950's and 60's, aftermarket suppliers such as Judson, Marshall, Shorrock and Wade popularized the blower as a reliable method for improving performance. Today, Moss Europe is actively reviving the tradition of supercharged British cars combining old-world attention to detail along with the advances of modern technology.

It has been a number of years since we last offered a TC/TD supercharger. We're proud to announce that a new kit is coming soon, and it's better than ever. Our new, complete supercharger kit is designed expressly for the MG TC/TD, using a modern Eaton blower supplying 5-6 psi of boost. You may expect a horsepower increase of around 40 percent. Step off the line with an authority your car has never known. Power delivery is strong and linear, and smoothness at idle is not compromised.

Appearance is important, so the Moss kit is designed to compliment your car's vintage good looks. We use a period correct 1 1/2" SU carburettor, and a traditional v-belt drive. Everything necessary for installation is included in the kit. Our new intake manifold casting has been designed to optimize flow, and even incorporates a traditional MG factory "Safety Fast" motto. With our step by step installation manual, you can install the kit yourself.

This supercharger system is designed to supplement an engine in good condition, not make up for lost power in a tired one. If your car has an old, fatigued engine you will want to overhaul it first.

Supercharger kit TC-TD150-030 ...**£3,609.00**
 Drive belt, replacement053-356**£15.25**

SmoothCut rev limiters

These rev limiters could save you from an expensive bill. Designed to allow full use of power up to maximum revs, where they will not exceed the preset limit. They work by progressively miss-timing the spark preventing an increase in engine speed from over revving due to missed gears or over exuberance.

SmoothCut rev limiter 4 cylinder preset 6,000rpm .TT2987**£92.59**
 SmoothCut rev limiter adjustable limitRL5**£141.90**

Ram pipes

Ram pipes (except period style) are fitted inside the air filter to help smooth the air flow into the carburettor. The shorter the ram pipe the higher up the rev range power is produced. If using with an air filter, a minimum clearance of 1 1/2" between the ram pipe and the filter case is recommended to ensure maximum air flow.

Ram pipes for SU carburettors

- 1 K&N ram pipe for HS4KN85-5039 ...**£14.40**
- Piper 30mm ram pipe for HS2SFR230**£25.50**

Vinyl and double duck hoods

The hoods supplied by Moss are made on jigs matching those used by the factory, by staff that have over 100 years experience of hood manufacturing between them.

The vinyl we use is from the same supplier that originally supplied the factory, these are the closest you will get to an original hood in terms of quality, fit and appearance. Double duck material is a canvas based material which whilst being durable, is prone to fading in direct sunlight.

For full details and hood frame/fixings please refer to the Restoration section for your model. Special requirements may be available to order, please contact your nearest Moss branch.

241-905

Hoods

Special note: Originally, TA, TB, and early TC's were trimmed in black duck (a heavy single ply canvas), later TC and TD's were trimmed in the same material but with a tan duck which was a light khaki tan.

TF were originally trimmed in a multi-ply canvas material, which was light tan. As these materials are now obsolete, we use high quality double duck.

- TD rack chrome/stainless steel243-705£136.50

HIGH CAPACITY FUEL PUMPS

Facet pumps ensure constant fuel flow and pressure even at high temperatures eliminating the problems associated with vapour lock.

The standard fuel pump may not be able to maintain adequate fuel flow and pressure at higher speeds, particularly with a tuned engine.

Facet fuel pumps are suited to all standard and modified engines fitted with carburettors.

Available in a variety of specifications to suit

the engine's fuel pressure and flow needs.

With safety in mind we recommend fitting a fuel pump inertia switch kit, so that in the event of an accident fuel delivery is automatically cut off.

See page A09 for more information

CARPET & CARPET SETS

We have a range of quality carpet sets in a variety of colours that are manufactured to high standards ensuring an excellent fit. Often using materials superior to those used for the original carpets. Where required, some of our carpet sets are moulded to follow the contours

of the floor pan as per the originals.

We also offer underfelt kits, competitively priced budget carpet sets for some models and embroidered carpet overmats.

See page A24 for more information, also see page 59 in Restoration section

Easy fit side mirror bracket

The TA, TB and TC mirror bracket was screwed to the frame, if you wanted to fit the mirror to the left side of the windscreen frame on TD and TF models, holes needed to be drilled and tapped, but now our easy fit (no drilling required) bracket is suitable for righthand or lefthand, fitting directly into the securing slot of the windscreen. Use with mirror head 407-347 to give you excellent rear visibility - even with a high mount luggage rack installed.

DYNAMAT NOISE & HEAT INSULATION

Two steps to a quieter, cooler, better feeling great car...

Step 1 Dynamat - to deaden the noise

Apply Dynamat to all the accessible interior panels of your car. Dynamat is best for noise reduction with some heat reduction... Start with firewall/bulkheads, gearbox tunnel, front floors, doors, rear floors, roofs, wheel arches, under bonnet, boot lid.

Step 2 Dynaliner - insulates against heat

Apply Dynaliner over the top of Dynamat to reduce heat soak by up to 70%. Also helps with noise reduction.

See page A28 for more information

Headlamp relay kits

Fitting halogen headlamps puts high loads on electrical components. These kits allow easy installation of relays into the headlamp circuit allowing for the high current circuit to be run through the relay.

Fitting relays in headlamp circuits protects your wiring and reduces the resistance in the circuit allowing full power to the lamps. Kits include relays and fittings. The single relay kit can also be used for wiring spotlamps, horns and other electrical accessories.

- Headlamp relay kit 2 relay117-515£31.65

Car covers

Protecting your cherished classic with a car cover will help to keep the paint, hood and brightwork in the best possible condition and safe from the elements. Whether you need a cover to keep the dust off your car whilst in your garage, a lightweight cover to take to the shows and occasional use, or a cover that provides excellent weather protection for cars kept outside all year round. Moss have the perfect car cover to fit your car!

236-016

Nylon lightweight cover

Tailored specifically to fit MG T-series cars, these light weight and compact covers are perfect for overnight use. When stuffed into their attached pouch, they measure only about 12" in diameter and 6" thick, but can be easily "squished" to about half that size. Car covers must only be used on a dry car.

Nylon car cover236-016£75.76

Loose fit indoor covers

Loose fitting indoor covers made from a soft non-scratch blue poly-cotton/ polyester mix material that is Scotchguarded making it damp and drip proof. Elasticated ends for a snug fit and door zips to allow easy access. Car covers must only be used on a dry car.

Loose fit indoor coverGAC9501£105.00

Weatherproof outdoor covers

Our range of outdoor weatherproof car covers are manufactured from breathable fabrics. They feature double-stitched seams throughout, with neoprene elastic sewn into the front and rear hems. Fitted with reinforced, scratch-proof grommets for tying down. Car covers must only be used on a dry car.

Mosom Plus (2 year warranty)

Rain resistant, yet breathable, it features a multi-layer polypropylene fabric which remains soft and pliable in all weather conditions with a soft lining. Recommended for short-term outdoor use, ideal for use in outdoor covered areas such as car ports. It also works well for an upgrade indoor cover. Car covers must only be used on a dry car.

Mosom Plus car cover237-400£93.00

Ultimate outdoor cover

Ultimate car covers by Classic Additions use a specially formulated advanced nanotechnology formula which gives a unique water resistant coating ensuring long term protection for your classic. Fully waterproof, fully breathable, strong and stretchy. Manufactured in a discrete grey colour these car covers are suitable for use both indoors and outdoors. Car covers must only be used on a dry car.

Ultimate outdoor car cover, size: S2GAC95031£174.30

Wheel trims

Another popular accessory from days past were wheel embellisher trims. Fitted in seconds, these polished stainless steel trims instantly improve the appearance of steel wheels, without breaking the bank.

TD-TF wheel trim 15" (each)502160Z£50.00

Wire wheel essentials

Creating an air tight seal on a wire wheel can be somewhat difficult, making the use of inner tubes necessary and, to prevent the inner tube chaffing against the spoke nipples, the fitting of a rim band is highly recommended.

Inner tube for 15" x 155/165 tyres452-755£12.60
 Inner tube for 15" x 175/185 tyres452-765£20.90
 Inner tube (standard) for 19" x 450/500 tyres ..454-410£33.60

 Rim band for 15" wheels452-750£10.60
 Rim band for 19" wheels452-760£14.65

Wire wheel tools

The use of a soft-faced hammer is essential if you do not want to damage chrome plated spinners when removing or fitting centre lock wheels. We have a choice of three soft hammers. Extra long spanners are also available, providing much greater leverage for spinners and therefore easier fitting. To help keep your wire wheels looking like new we recommend you use our specialist cleaning kit. We also supply a special lubricant to help keep the splines in good condition.

Copper and hide hammerC27290£25.00
 Copper faced hammer11B5166£25.00
 Spoke adjusting spannerMM385-800 ...£9.50
 Short octagonal spannerAHH5839£5.90

 Long spanner 2-earedMM386-125 ..£48.50
 Wooden wrench 2-earedAHH5839W ..£25.60
 Copper grease spline lubricant 50gGGL9205X ...£3.66
 (This unique double ended knock-off wrench, made from plywood, slips over the spinner for easy tightening and removal of spinners. Will not work with centre laced wheels.)

Centre lock spinners

All our centre lock spinners are made from the highest quality materials and are precision engineered to ensure an accurate fit. We have three styles of spinner to choose from: octagonal, two or three eared. Two and three eared spinners can be fitted with either a hammer or a spanner, octagonal spinners require a spanner.

The basic rule for threads-per-inch (TPI) is, if you have replaced your splined hubs with new ones, then you probably need 8 TPI spinners but please check before ordering.

Note: Please check local regulations for eared spinners.

Wire wheel conversion kits

These kits will enhance the appearance of any TD and are identical to the original factory option for the TF. Our wire wheel conversion kits convert your disc wheeled TD or TF to wire wheels.

Each kit includes; four splined hubs, four brake drums, one spare wheel adaptor (with spinner) to convert spare wheel carrier to wire wheels, and all the studs, nuts, for an easy installation. We do not include wheels or spinners in the kits, allowing you to determine your own style.

Note: You will need 12tpi wheel spinners. For replacement components please refer to the Restoration section.

Wire wheels

An essential part of a British classic sports car's styling was the fitment of wire wheels. Whether fitted as standard or not, a set of chrome wire wheels will not only enhance the appearance of your car, but also the value.

Our wire wheel spokes and nipples are manufactured from stainless steel, with the chrome wire wheel spokes and nipples finished by chroming over the top in keeping with the rest of the wheel. They are available in different specifications; 48, 60 or 72 spokes, and a choice of classic chrome finish, or painted in wheel silver.

Depending on how you are intending to use your car, these wheels are available in standard or uprated specification. Before fitting your tyre choice, please ensure there is adequate clearance between the tyres and wheel arches.

Period style seat belt

This period style seat belt features a chrome catch and fittings. Note: Not 'E' marked, requires plates TT7968 and bolt spacer kit TT7969).

- Period style seat beltAKF1646B ..£58.50

Vintage competition lap belt

The ultimate sporting accessory, ideal for early MG classics, it features a quick release buckle and includes fittings. This belt is not type approved therefore should only be used in cars that pre-date seat belt regulations.

- Vintage competition lap belt (each)MM222-211 ..£111.55

Securon seat belt and harness kits

This is our range of Securon replacement seat belts to best suit MG T-Type models. All Securon seat belt products are 'E' approved for road use. As early MG's were not originally fitted with seat belts it is essential that the belts be fitted carefully and that the correct hardware is used. Please call Moss Bradford for advice. Each kit contains suitable bolts for each mounting point, but you will need to use the reinforced nut plates (Part No: TT7968) where necessary.

Type A: Static seat belts

This can be bolted to the upper mounting on the wheel arch, the end of the webbing is retained at the sill mounting, and the stalk is fitted to the tunnel. Once positioned the strap can be adjusted for length and fit on the over-shoulder section of the belt.

- Static seat belt 30cm stalk - blackSBS300/30£24.70
- Static seat belt 30cm stalk - redSBS300/30RED . . .£34.00
- Static seat belt 30cm stalk - beigeSBS300/30BGE . .£34.00
- Static seat belt 30cm stalk - greySBS300/30GREY .£34.00

Type B: Automatic seat belts

The reel should be bolted to the lower inner side of the rear wheel arch and the guide at shoulder level on the wheel arch. The end of the webbing is retained at the sill mounting, and the stalk is fitted to the tunnel. The reel must be mounted vertically for the mechanism to operate correctly. This is the recommended inertia reel seat belt mechanism as it allows clearance for the hood frame when folded.

- Automatic/fixed seat belt 30cm stalk - black .SBS500/30£41.20
- Automatic/fixed seat belt 30cm stalk - red . .SBS500/30RED . .£49.50
- Automatic/fixed seat belt 30cm stalk - beige .SBS500/30BGE . .£49.50
- Automatic/fixed seat belt 30cm stalk - grey .SBS500/30GREY .£49.50
- Automatic/fixed seat belt 30cm stalk - blue .SBS500/30BLU . .£49.50

Seat belt extender

This can be used to safely extend the seat belt if required. It should only be bolted to the sill mounting position and then bolted to the eyelet on the end of the seat belt. It must not be used at any other mounting point. 'E' approved for road use.

- Seat belt extenderSBS227£8.34

Harness fittings

- Harness back strap adapter (pair)TT7972£6.30

Ordering Information

Notification of prices

Due to the volatility of world markets and currency fluctuations the prices in this catalogue are subject to change. Moss make every attempt to keep prices competitive and stable, however in common with all other suppliers in our industry, we reserve the right to alter these prices without prior notice.

For the latest prices, please visit our website www.moss-europe.co.uk. All prices are per unit (unless otherwise stated) and include (UK) VAT at 20% (where applicable) and are correct at the time of going to print. Postage and packaging is not included. E&OE. Where the price is replaced with NCA this part is Not Currently Available. Please visit our website (moss-europe.co.uk) or call our sales staff for the latest availability information or to enquire if we can offer an alternative part.

Product supersessions

Moss Europe's policy is to detail the most up to date part information in our catalogues. Where possible parts are kept to original specification. However, in some instances we have to supersede to the most viable alternative product to maintain supply and keep cars on the road. Every effort is made to ensure high quality products.

UK ordering

We accept orders by mail, telephone, e-mail, fax and on-line at www.moss-europe.co.uk. If you have the opportunity, we invite you to visit one of our branches. Remember, supplying details of your car, (i.e. engine, commission or Vehicle Identification Number (VIN) LHD or RHD, year of manufacture and any modifications) saves time and helps us to help you. Please inform us of your customer number, as this will speed up the processing of your order.

Overseas ordering

We accept orders by mail, telephone, e-mail, fax and on-line at www.moss-europe.co.uk. If you visit the U.K. please come and visit one of our branches. When ordering, please ensure that you enclose full details of your name, address and customer number, plus details of your car (i.e. engine, commission or Vehicle Identification Number (VIN) LHD or RHD, year of manufacture and any modifications).

Please note: Overseas orders are often subject to local import duties, taxes and Customs clearance, which will need to be paid for at the point of entry. These charges are NOT included in the price of the goods or delivery prices. All relevant Customs forms and documentation needed to ensure the order arrives with the minimum of delay, will be included with your shipment. If you have any special requirements, please contact us to discuss them. Delivery charges are dependent upon the size and weight of the shipment. If a quotation is required prior to placing an order, please contact the export department at your chosen branch and they will be pleased to supply a full quotation.

Parts back-order system

A back-order system is used when a part is not in stock at the time of ordering. If the item is expected to become available within 6 months, then it will be put on back-order, unless the customer instructs us otherwise. When we have the parts in stock, the back-order will be processed automatically and the item will be dispatched to the customer. If the particular part becomes No Longer Available (NLA) or does not become available within 6 months the back-order will be cancelled. If you are unsure when you placed a back-order contact your local branch.

Dispatch & delivery methods

Orders for delivery in the UK may be dispatched by regular post for small/lightweight items, larger items may be dispatched via a courier. Please call us for the best delivery option for your order and the latest delivery prices. For delivery outside the UK we offer the following services.

- **Economy delivery (by road):** 2 to 5 days (approximately).
- **Express delivery (by air):** 1 to 2 days (Guaranteed) - next day service to most countries.
- **For small and low value orders we also use airmail.**

For these services, please ask for prices and the best delivery option when you place your order. Most deliveries (except airmail) are 'trackable', (inc: e-mail updates and internet access for selected carriers). Please remember, all carriage charges are dependent on weight band, volume, destination and delivery time. If a quotation is required prior to placing your order, please contact a member of the sales department. Alternatively, you can arrange your own delivery and dispatch.

Windscreen delivery information

We always suggest that windscreens should be collected from one of our branches to ensure you are able to transport your glass with the utmost of care. However, we understand that this is not always possible.

To minimise the possibility of damage to the windscreen in the shipping process, it is now Moss Europe's policy to ship windscreens packed in a specially designed heavy duty 'Tri-Wall' cardboard box. The price of this box is £35.00 (inc VAT), non-refundable and is included in the price of the product. The crate's dimensions will also increase shipping costs, particularly in EU countries. The crate dimensions are 150cm x 33cm x 74cm. The maximum volumetric weight is 92kgs. For more information please contact your nearest Moss branch.

Hazardous goods delivery information

At the time of going to print, Moss Europe Ltd conforms to international shipping regulations regarding packaging and transportation of Hazardous Goods by road and sea freight (only). Due to these international shipping regulations and licencing rules all goods deemed as Hazardous are currently available for shipping to the UK and Europe only. If you place an order containing Hazardous goods and your shipping address is not in the UK or Europe, we will not be able to ship this item to you. Please contact your local branch or visit our website moss-europe.co.uk for the latest delivery information of Hazardous goods.

Quotations & payment methods

We will be pleased to provide a full parts quotation detailing price, availability and relevant shipping costs. Payment may be made by cash, personal cheque (to the card guarantee limit), Certified Bank Draft, Sterling Travellers Cheques and credit or debit card including: Mastercard, Visa, Delta. If you intend to make payment by Cheque or Bankers Draft when

using our fast mail-order parts service, please confirm parts availability and carriage charges. We can accept payments using PayPal for website, email and phone orders.

Value added tax (VAT)

Value Added Tax (VAT) at the current rate will be levied on all orders being dispatched to all countries within the European Community. EU countries may be charged at their local VAT rate, please contact us or see website for details. VAT is not charged on goods dispatched to countries outside of the EU. However, such orders are often subject to local import duty, taxes and Customs clearance, which MUST be paid by you at the port of entry. Such charges are not included in the cost of the goods or delivery prices.

Exchange units

We are able to offer a full rebuild service on numerous major components in our product range. We offer this service as an alternative to direct replacement parts, or when a brand new item is no longer available. However, the continuity of this exchange scheme needs the understanding and co-operation of our customers in relation to several important points: It is important to remember that "rebuild" does not mean "brand new". Rebuilding a unit involves stripping, cleaning, inspecting and re-assembling the unit. During this process, parts showing signs of wear will either be completely replaced or suitably renovated. However, it is not always feasible for major sub-components to be replaced with brand new ones, for example, an exchange engine will not have a new block. Due to the nature of certain product lines, some items can only be offered on a "one for one" exchange basis. This effectively means that you must offer us a viable unit before we can release a fully rebuilt item from our stock. In some instances we can only carry out reconditioning of your own unit. Our staff will inform you if this is the case.

All exchange units are subject to a surcharge. This surcharge serves two purposes; firstly, it acts as an incentive for you to return your old unit, and secondly it provides us with financial cover if your returned unit proves unsuitable for exchange purposes.

Whether or not your returned unit is suitable for exchange purposes cannot be ascertained until it is made available to us for inspection. As a general rule, suitable for exchange basically excludes any items that are beyond reasonable repair (e.g. crankcases pierced by a connecting rod) or units irrevocably damaged. We are also unable to accept units unless they are returned in whole, complete form (i.e. differential units which are returned partly stripped with no bearings and all the shims missing are not generally accepted), nor do we accept a "box of bits".

Surcharges will only be refunded once our core department has passed the item as serviceable. Under no circumstances can any exchange unit be shipped overseas until we receive your original unit. We have predetermined prices for our exchange units based on our experience of repair costs for a gearbox, axle or engine. Occasionally, however, the damage to the unit is so great that we will contact you before beginning work on your unit to advise you of any additional cost that may be incurred during the rebuild of the unit. We can return the unit (at your cost) if this proves unacceptable.

'Old unit' returns

Exchange items including reconditioned engines are subject to a surcharge that is refunded when a rebuildable unit (core) is returned. When you receive the rebuilt unit, attached to it will be a Core Return Authorisation Tag. This tag must be removed from the rebuilt unit and attached to the returned core in order to receive credit. Cores must be returned within 90 days of purchase in the original box, carton or engine cradle supplied with the rebuilt unit. Cores must be shipped clean and empty of fluids. Cores must be complete, assembled and rebuildable to receive credit or refund. You must pay all shipping charges for the return of the core and these charges are not refundable.

Warranty

All parts are warranted against defects in materials and workmanship for a period of twelve (12) months from the date of purchase. The warranty does not cover failure resulting from incorrect installation or misuse; failure during any competition, motorsports or track events; failure of any, or caused by any, related component. The warranty does not cover labour charges, nor will a warranty settlement be greater than the cost of the original component. Should you need to make a warranty claim, please contact us immediately at the branch of purchase. We will then advise you as to the best course of action. With all warranty claims a copy of the original purchase invoice must be produced.

Warranty returns

Parts that fail in use may be returned for 12 months from the date of purchase. Returns must be accompanied by the original invoice - no warranty claims will be paid without a copy of the original invoice. Return freight will be reimbursed. Electrical parts returned for warranty will be tested and if found functional, no return credit will be given and the part will be returned. Reimbursement is made by the original payment method. Complete the return form included in each order, pack the items securely and use the shipping return label supplied.

Non-warranty returns

All uninstalled parts, in their original packaging may be returned within 90 days for any reason. A copy of the original invoice or the picking label (which is generally attached to the original packaging) must accompany the return. Return freight is paid by the customer. If the return is due to our error, the return freight will be reimbursed. Parts returned outside of this policy or in non-resalable condition may not be accepted or may be assessed a 15% handling fee. Reimbursement is made by the original payment method. Complete the return form included in each order, pack the items securely and use the shipping return label supplied.

Customer service

We value your custom and wish to ensure that you receive the very best service. Every effort will be made to provide you with Quality Parts and Expertise in a relaxed, helpful and friendly manner. Should you consider the service you receive from us to be unsatisfactory, or you have any problems with the part(s) purchased, please advise a member of the sales team at the originating branch. If the matter is not resolved to your satisfaction, please e-mail our Customer Services Department at customerservices@moss-europe.co.uk or write to: **Customer Services, Moss Europe Ltd Unit 16, Hampton Business Park, Bolney Way, Feltham TW13 6DB England.** *We will do our very best to resolve the issue.*

'T' Type Production Data and General Information

TA

Production Period: June 1936 - April 1939
Car Numbers: TA0251 - TA3253

Abingdon Production: At this time Abingdon was virtually no more than an assembly plant and all items such as chassis, engines, transmissions were shipped into the plant from other Nuffield owned factories.

TB

Production Period: May 1939 - September 1939
Car Numbers: TB0251 - TB0629

Autumn 1938: Leonard Lord, rationalising parts usage in Morris production, announced the new XPJM engine from Morris Engines. The 1250cc XPAG unit was adapted from this model replacing the overhead camshaft Wolseley units originally destined for the TA.

TC

Production Period: November 1945 - November 1949
Car Numbers: TC0251* - TC10252

1945	17th September - 21st December	TC0251 - TC0351
1946	17th January - 31st December	TC0352 - TC2051
1947	17th January - 31st December	TC2052 - TC4411
1948	5th January - 24th December	TC4412 - TC7502
1949	5th January - 29th November	TC7503 - TC10251

February 1945

Cecil Kimber, 56 years old, was killed in a railway accident just near Kings Cross Station, London. He had been manager of MG from 1923 until 1941 when he left after a major row with Miles Thomas, then managing director of Nuffield Group. Kimber had been the inspiration behind the first special bodied Morris bull-nose cars carrying the MG badge.

Purchase Tax

This new tax was introduced following the war to fund the rebuilding of Britain, pushing the cost of new MG's up to high levels.

Export Drive Begins

In 1947 Abingdon officially began exporting MG's to the USA. All early exports to the US were RHD because of the difficulties of conversion. Only 20% of the total TC production was officially exported to the USA. *TC0251 appears to have been the prototype model TC and is often not counted in TC production figures.

TD-1

Production Period: November 1949 - August 1951
Car Numbers: TD0251 - TD9158

1949	10th November - 20th November	TD0251 - TD0348
1950	2nd January - 22nd December	TD0349 - TD5169
1951	1st January - December	TD5170 - TD12577

TD-2

Production Period: August 1951 - September 1953
Car Numbers: TD9159 - TD29915

1952	1st January - 31st December	TD12578 - TD23634
1953	1st January - 17th August	TD23635 - TD29915

TD-2 & TD MkII

The TD-2 was the standard production car from September 1951 through 1953 and should not be confused with the TD MkII which had been developed and sold in limited numbers. The MkII was really intended for competition use only. The rare TD MkII was fitted with large valves in the cylinder head, 1 1/2" carburettors, twin fuel pumps and additional Andrex friction dampers.

Chassis Numbers

Traditionally, all new MG models began with the chassis number 251. Abingdon 251 was in fact the factory's telephone number. Once taken over by BMC this traditional and delightful practice was stopped, perhaps in an effort to prove to Abingdon that they were now no more than a subsidiary of the mighty BMC empire. In 1955, proving otherwise George Eyston and Ken Miles, using the new MG XPEG 1466cc TF engine, took eight endurance records in Utah. It proved to the world that MG, though now a poor relation of BMC, still had what it took when it came to competing against all-comers.

TF

Production Period: October 1953 - May 1955
Car Numbers: TF0501 - TF10100

1953	17th September - 31st December	TF0501 - TF2177
1954	4th January - 30th December	TF2178 - TF8643
1955	4th January - 4th April	TF8644 - TF10100

Once Again

As was the case with the TD, the new TF was put together in just 2 weeks, this time by John Thornley and Syd Enever, following their failed attempt to talk Leonard Lord into providing funding for a replacement TD. Soon after, following widespread criticism of the new TF, funding was provided to produce the MGA.

November 1954

Conversion of the XPAG to XPEG engine: Fitting of the 1466cc XPEG engine occurred in small batches during November 1954. The XPEG unit was initially sold in North America only. The British public, although hearing rumours of the larger engine's production, had to be content with buying the old model 1250cc XPAG engine until production stopped.

TF6501 - TF6650	(1466cc)
TF6651 - TF6750	(1250cc)
TF6751 - TF6850	(1466cc)
TF6851 - TF6950	(1250cc)
TF6951 - TF10100	(1466cc)

A Brief History Of The Development Of The 'T' Type.

H.N. Charles develops new TA at Cowley guided by Cecil Kimber. (Authorised & developed in 1935-36).

Chassis: Under slung style copied from the 1920's French design (first used on C type Montlhery Midgets of 1931).

Engine: Based on Morris's 1292cc side valve unit, cork faced wet clutch, four-speed gearbox without synchro.

Suspension: Half elliptic springs front and rear with Luvax shock absorbers.

Brakes: First Midget fitted with hydraulic brakes.

August 1938: Announcement of the Tickford Drop-Head Coupé with folding hood.

TB introduced May 1939 using TA body and chassis but with new XPAG engine, dry plate clutch, revised gearbox (with synchromesh on 2nd gear). 5:12:1 rear axle. Only 379 models were produced before onset of World War II. Abingdon turned its hand to war production.

November 1945 introduction of the TC. War production ceases and Abingdon returns to motor vehicle production. The body shell was based on pre war TA/TB model, but widened by 4" (similar to Tickford TA shell). Single 12-volt battery introduced. Luvax/Girling front shock absorbers fitted.

Exporting to the United States of America: TC7380 first USA official export model built in December 1948.

First TD mock up produced by Syd Enever and Alec Hounslow in two weeks during 1949. It was cobbled together using a YA type chassis (cut and shut) and heavily hammered TC body. Engine as per TC but gearbox used a new gearbox extension. Front Suspension altered to coil spring (a la YA, Morris 10 series M, MGA and MGB). Hypoid rear axle fitted. Rack and pinion replaced steering box. Pressed steel wheels fitted to take account of new suspension geometry. Two leading shoe front brakes installed. First batch of TD's was followed by the inclusion of tubular steel scuttle support to counter scuttle shake. Body extensively altered but similar in appearance to TC. Bumpers fitted.

Summer 1950, perforated wheels fitted as standard.

TD MkII introduced (August 1951).

Improved XPAG engine installed (engine XPAG/TD/9408 onwards). 8" clutch fitted with new flywheel and gearbox housing.

Engine XPAG/TD/14948 increased capacity sump pan fitted.

New style round tail lamps fitted from chassis number TD21303.

Rod control clutch linkage fitted from chassis TD22251 on.

Centre mounted wiper motor fitted at chassis number TD22315. (Fitted as safety feature).

From engine XPAG/TD/24116 new camshaft fitted to improve power.

The TF 1250 ran on the last modified TD chassis using TD running gear and components, but with raised gearbox final drive. Centre lock wire wheels became an option (theoretically this had become possible for the TD so long as the new TF-style hub and fittings were used). Perforated disc wheels were standard. New style grille accompanied altered bodywork. Sealed in headlamps completed the newer shape. Individual seats were finally adopted. Wiper motor hidden under fascia with scuttle-mounted wipers.

XPEG engine introduced gradually in November 1954 (see notes below # and conversion chart left *).

The new XPEG engine: First introduced at chassis number TF6501 in November 1954. The new XPEG engine had been designed, during the early fifties, by Morris Engines Branch. Boring out the XPAG engine was considered impossible as it had already been increased in capacity from 1140cc and the cooling system would be unable to dissipate heat from the block quickly enough if further change were made. A revolutionary new approach was used to redevelop the entire cylinder block and alter the cylinder head. Once designed, sufficient stocks of the engine were built up before being introduced to the Abingdon assembly lines in batches during November 1954.

Late TF (chassis number TF10100 engine XPEG/TF/3940) produced on 4th April 1955.

Location of Serial Numbers

Please note: In most circumstances Moss can supply both an OE (Original Equipment) part or an Aftermarket part. The Aftermarket part offers a high quality part but usually at a reduced price and in certain circumstances replaces the OE part when no longer available. The Aftermarket part is indicated by a letter "Z" at the end of the part number.

Note: These pages list only the major items in each area, such as body work, electrical and brake components. In many cases minor fittings, clamps and linkages etc, are not shown.

External Engine

A Brief History of the 'T' Type Engine

The new MG TA should have had a Wolseley overhead camshaft engine, but it was cheated of this power unit at the last moment by Leonard Lord. Rationalisation plans forced them to use the "new" version of the old side valve unit designed by Hotchkiss & Cie, destined for the Wolseley 10/40 saloon. The engine (coded MPJG) was modified further just in time for the release of the TA, using twin SU carbs, modified camshaft and exhaust manifold.

1939 saw the introduction of the MG TB with a 1250cc XPAG engine (from the new Morris 10 XPJM unit). This engine was used (with further modifications in 1951 for TDII models) right up to the end of production of the TF model.

The 1500cc XPEG power unit (introduced in 1954, and running concurrently with the older XPAG engine) was the result of a major redevelopment of the XPASG unit and were mostly fitted to TF's that were destined for the American market.

Note: Although our supply of TA components is somewhat limited, if there is a specific component that you require that we have not illustrated/listed, please don't give up hope. For there are occasions when we hear of items (sometimes original) that suddenly become available, please contact your nearest Moss branch for latest information.

	408-735	£20.10	PLATE, valve clearance, 0.019"	1	

***Note: Can be used on TD MkII & TF if the inlet ports are bored to 1 1/2".

Cylinder Head Depth

Original 1250 or 1500 cylinder heads had a thickness of 3.022", but over the years, many have been excessively machined, causing problems with detonation and/or overheating. Two head gaskets can be fitted, which will increase the effective cylinder head thickness by approximately 0.045".

Rebuilding T Type Oil Pumps

Most 'T' Type oil pumps can be rebuilt to like-new condition, but care must be exercised that proper gear end float clearances are obtained. Specifications are listed in the workshop manuals and the machine work can be entrusted to your local (& competent) machine shop.

Internal Engine				
Pistons, Rings & Valves				
We are pleased to offer a complete range of Aerolite brand pistons. These high quality pistons are manufactured to the original solid skirt 3-ring design, but incorporate the very latest in high strength, high silicon content aluminium alloy. All pistons are produced in permanent steel moulds for maximum strength yet light weight.

15	433-040 £2.54	VALVE COTTER, each	16	
***Note: If using improved oil seals ADU4905 then the oil deflector 1H725 is no longer needed.				

Unleaded Petrol and Your Valves

Today's unleaded fuel does not protect original style valves & valve seats against valve seat recession. We strongly recommend our Stellite-faced exhaust valves and silicone bronze valve guides. A full & permanent conversion to lead-free operation would also include fitting hardened exhaust valve seats. However, since valve seat inserts could conceivably loosen and fall out, causing considerable damage, we only recommend that these be fitted when inserts are also required to repair existing serious valve seat wear.

Oil Cooler Kits

The TB-TC and early TD kits are for early vertically-mounted oil filter applications. The connecting pipe (see External Engine on pages 06/07 - item No 136) is eliminated and oil pipes are connected directly to block and filter. Late style kits incorporate a cast aluminium 'sandwich' plate to fit between the oil pump and filter canister. Oil coolers are normally mounted below the splash apron. Oil coolers are not included with the installation kits and must be purchased separately.

	MM235-935	£47.20	OIL COOLER INSTALLATION KIT	1	TB-TC & TD To (e) 14223
	MM235-945	£106.40	OIL COOLER INSTALLATION KIT	1	TD From (e) 14224, TF
	AR09807	£66.00	OIL COOLER, 10 row	1

Oil Cooler Kits

Note: See also notes at the bottom of page 09 and also see the Accessories section for further details.

The TB-TC and early TD kits are for early vertically-mounted oil filter applications. The connecting pipe (435-460) is eliminated and oil pipes are connected directly to block and filter. Late style kits incorporate a cast aluminium 'sandwich' plate to fit between the oil pump and filter canister. Oil coolers are normally mounted below the splash apron. Oil coolers are not included with the installation kits and must be purchased separately.

MM235-935	£47.20	OIL COOLER INSTALLATION KIT	1	TB-TC & TD To (e)14223
MM235-945	£106.40	OIL COOLER INSTALLATION KIT	1	TD From (e)14224, TF
AR09807	£66.00	OIL COOLER, 10 row	1	
ARA221	£38.00	OIL COOLER, 13 row	1	

Spin-on Oil Filter Adaptor

Upgrade your TD & TF to use a modern efficient style spin-on cartridge type oil filter. As well as offering better filtration they make oil changes a cleaner and simpler operation. Includes adaptor, seals and fittings, filter not included. Suitable for TD's from (e) 14224 and TF models.

235-865	£101.26	SPIN-ON ADAPTOR KIT	1	
GFE173	£4.80	OIL FILTER	1

Wire Wheel Conversion Kits For TD & TF Models

The following wire wheel conversion kits are designed to convert your disc wheeled TD or TF to wire wheels. Each kit includes four splined hubs, four brake drums, one spare wheel adaptor with spinner (to convert spare wheel carrier to wire wheels), and all the studs, nuts, etc. for an easy installation. These kits will enhance the appearance of any TD and are identical to the original factory option for the TF.

Note: Our conversion kits do not include wheel or spinners.

111-518	£790.00	WIRE WHEEL CONVERSION KIT	1	TD-TF
AHH7317A	£23.80	WHEEL SPINNER, 2-eared, RH	2	with MG motif
AHH7318A	£23.80	WHEEL SPINNER, 2-eared, LH	2	
AHH7315A	£24.00	WHEEL SPINNER, octagonal, RH	2

Brake System, TD & TF

Note: See the Restoration Tools catalogue for our full range of brake fluids.

Handbrake, Pipes & Hoses

Part Number	Price £ea.	Description	Req.	Details
1	181-360	£5.24 HANDLE, handbrake lever	1	
2	ACC8956	£12.17 BUTTON, brake release, chrome	1	
3	181-320	£87.50 PAWL, handbrake ratchet	1	
4	181-440	£6.90 RIVET & WASHER	1	
5	331-060	NCA CABLE, handbrake, OE type	2	
	331-058	£21.90 CABLE, handbrake, aftermarket	2	
Note: The 331-058 handbrake cable is very similar to cables originally fitted to the MG TD and TF. All critical dimensions are correct. The OE type metal spiral housing has the unique combination of wide & narrow strips formed into a tube or housing for the inner cable. This OE type spiral housing is covered in a black plastic sheath, a non-OE feature that protects the steel housing from water, dirt, and road grime, which in turn protects the inner cable and maximizes the useful life of the e-brake system. If originality is your goal, nick the plastic cover with a knife point or a utility knife and peel the black plastic sleeve off the cable.				
6	CLZ515	£1.03 PIN, cable to rear cylinder	2	
7	181-310	£10.80 BAR, cable equalising	1	
8	311-520	£5.60 NUT, handbrake adjusting	2	
9	ACH8508	£1.10 SPRING, handbrake adjusting nut	2	
10	27H7395	NCA LEVER, handbrake	2	(inc. with rear wheel cyl.)
11	ACA5359	£1.80 PAD, brake & clutch	2	
12	320-370	£1.33 BOLT, brake & clutch pedal	2	
13	AJD8105Z	£0.18 NUT, pedal bolt	2	
14	330-100	£6.30 BUSH, brake pedal & clutch pedal	2	
15	324-430	£7.60 WASHER, pedal spacing	2	
16	326-050	£0.58 CIRCLIP, pedal shaft	1	
17	329-320	£4.74 SPRING, brake pedal	1	
18	280-420	£13.60 FUME EXCLUDER, rubber	1	brake & clutch pedal

Steering, TA-TB & TC

Note: See the Accessories section for further details of steering wheels.

These 'Brooklands' vintage steering wheels - complete with crested centrepiece and clamp bolt assembly, were available as optional equipment when the TC was new. The classic design was in demand by MG enthusiasts going well back to the 1930's.

Tompkins Steering Kit

The Tompkins steering kit consists of a machined & polished aluminium casting which houses a roller thrust bearing and spacer. This replaces the steel thrust plate on top of the steering gear, thereby eliminating all drag at this critical point and, at the same time provides an easy and extremely accurate adjustment of the sector shaft.

Also included (as well as concise installation instructions) is a needle bearing which replaces the felt bush at the top of the column. While we have supplied hundreds of these kits to (very) satisfied customers, we must emphasise that unless the entire steering and front end are in perfect condition the kit will effect only a slight improvement.

With a properly set up front end, and the addition of the Tompkins steering kit, your TA-TB or TC will be a very pleasant car to drive.

Steering, TD & TF

Note: See the Accessories section for further details of steering wheels.

Steering Column

We are pleased to offer the first and only true original type steering wheel available since the last TF rolled off the assembly line in 1955! 'Goldish-Tan Pearlescent' trim with metallic bronze hub. (Don't be mis-led by the mottled brown rim most people consider original) The centrepiece matches the factory colour and fit.

Shock Absorber Bush Installation Kit

Installing new Girling shock absorber bushes and link pins has been a great source of frustration for early TD owners for years. Replacement bushes available over the years have been either very easy to fit (and coming apart just as easily) or nearly impossible to fit! We have introduced a well designed installation tool set, with detailed instructions.

Shock Absorber Bush Installation Kit

Installing new Girling shock absorber bushes and link pins has been a great source of frustration for early TD owners for years. Replacement bushes available over the years have been either very easy to fit (and coming apart just as easily) or nearly impossible to fit! We have introduced a well designed installation tool set, with detailed instructions.

NI	MM385-890	£66.40	BUSH INSTALLATION KIT	a/r

TA-TB & TC Differential Pinion Cap

This re-engineered item incorporates a modern double-lipped oil seal in a precision machined alloy housing. The really clever aspect of this design is that the seal is positioned so as to fit against the unworn portion of the original pinion flange, eliminating any need for machine work. The installed unit, when painted, duplicates the original appearance.

33	265-198	£86.10	DIFFERENTIAL PINION CAP	1

TD & TF Crown Wheel & Pinion Gear Sets

Crown wheel & pinion gear sets for the TD & TF are no longer available. While original gear sets are very longwearing, standard rear axle ratios (particularly the 5.125:1 ratio as fitted to most TD's) are not well suited to modern highway driving conditions. We feel that the best ratio for a regularly driven TD or TF is a 4.55:1 ratio (fitted as standard on MG ZA & ZB models). MGA or MG ZA/ZB gear sets can be fitted without permanent modification. We offer a 'crown wheel & pinion conversion' Workshop Manual (part no. 212-350) which covers this somewhat detailed process. A complete CW&P conversion kit (102262K) consisting of all the major parts needed to convert to the MGA CW&P is available in addition to the manual. Includes crown wheel & pinion, spacer & pinion bearing. It does not include parts for a normal rebuild; you will need to buy these separately.

Wiring Looms & Connectors

All of our T-series wiring looms feature original style braided cloth binding over original type lacquer-braided individual wires. These are colour-coded to original specifications and include required connectors. As was the case with factory replacement looms, neither the under-dash sub-loom connecting between various points on the dash itself, nor the TF headlamp pigtailed are included. For U.K. MOT purposes any car manufactured after 1936 must carry red rear/white front indicators or separate amber ones, our looms marked with (*) allows indicators to be incorporated in the side and tail lamps.

1	CRST122	£1.85	DECAL 'LUCAS'	a/r	
2	357-470	£167.00	WIRING LOOM, lacquer-braid (No wires for indicators).	1	TA & TB

Dashboard, Switches, Instruments & Cables

Dashboards, TA-TB-TC & TD

We offer dashboards both in a finished veneer or a plain plywood. TA's-TB's & TC's to approximately (c)5000 were originally fitted with the finished veneered dashboards. TC's from approximately (c) 5000 and all TD's were fitted with the plain plywood.

1	456-885	£247.90	DASHBOARD, finished veneer	1	TA & TB
	456-895	£117.64	DASHBOARD, plywood	1	
	233-635	£280.00	DASHBOARD, finished veneer	1	TC
	456-890	£120.61	DASHBOARD, plywood	1	
	233-530	£544.00	DASHBOARD, finished walnut veneer	1	TD RHD
	233-570	£135.00	DASHBOARD, plywood	1	
	233-645	£515.00	DASHBOARD, finished walnut veneer	1	TD LHD
	233-510	£139.00	DASHBOARD, plywood	1	

Instruments & Cables

Our 'replica' speedometers & tachometers, while not quite original enough to call 'reproduction', are excellent replacements for the completely obsolete TC and early TD flat-faced instruments. They can also be used to replace the obsolete dish-faced TD instruments if required. We no longer offer rebuilding service on speedometers, tachometers or clocks.

2	360-460	£201.40	REPLICA SPEEDOMETER	1	TC & TD To (c) 10778

Brooklands Type Aero-Screens

This period style aero-screen incorporates a polished cast aluminium frame, chrome plated brass fittings and laminated safety glass. While similar to factory aero-screens they do not fit directly onto the T Series scuttle, mounting brackets are therefore supplied, sold individually.

700896	£71.50	AERO-SCREEN KIT, reproduction	2

Wire Wheel Conversion Kit

The following wire wheel conversion kits are designed to convert your disc wheeled TD to wire wheels. Each kit includes four splined hubs, four brake drums, one spare wheel adaptor with spinner (to convert spare wheel carrier to wire wheels), and all the studs, nuts, etc... for an easy installation. These kits will enhance the appearance of any TD and are identical to the original factory option for the TF.

Note: Our conversion kits do not include wheel or spinners. Parts required in addition to the conversion kit are listed here.

111-518	£790.00	WIRE WHEEL CONVERSION KIT	1

*Note: Windscreen bracket will require drilling and tapping to mount above mirrors. See page 57 for alternative LH mirror bracket (that does not require drilling).

Wind Wings & Period Sun Visors

Our classic polished clear Plexiglas wind wings eliminate side draughts to make motoring in your T Series MG more pleasurable. Sold in pairs complete with chrome mounting hardware. Installation is easy, no windscreen frame drilling required. The green tinted Plexiglas sun visors are easily fitted and require no drilling, they have chrome plated mountings similar to the wind wings and are a most useful accessory. Sold individually.

*Note: Windscreen bracket will require drilling and tapping to mount the above mirrors. For an alternative bracket that doesn't require drilling, read on.

Easy Fit (Side) Mirror Bracket & Stem

The TA-TB-TC mirror bracket was attached to the windscreen by two screws and, if you wanted to fit the same optional mirror to the passenger side of the windscreen on TD and TF models, then holes had to be drilled and tapped in the windscreen frame. Our new style of bracket (supplied with dome nut, taper & flat washers) is suitable for right or left hand installation, fitting directly into the securing slot of the windscreen when in the lowered position. Now you can put down that electric drill and stop trembling because no drilling is required! Moreover, the bracket is not a permanent fitment. Using the 407-347 mirror head, excellent rear visibility is offered - even when the high mount luggage rack is installed.

407-488	£32.60	BRACKET KIT, (side mirror) (Fits left or right hand side of windscreen).	a/r
407-347	£146.60	MIRROR HEAD	a/r

Interior Trim

Our complete range of interior trim for MG T Types is designed to delight the purists. We incorporate many original design features which a custom upholstery shop could not hope to duplicate. All leather and vinyl materials have been carefully selected for texture and are production-dyed to recreate the original colours, beige (TA-TB only), biscuit, green & red. We also offer a selection of alternative colours for those looking to personalise their interiors; black, tan & honey tan.

Trim Panel Kits

All components are pre-cut and pre-sewn by our own upholstery shop with extraordinary results. Every stitch follows the course of the original. The hidem tacking strip matches perfectly and is sewn through the plywood for exact placement and easy installation. The door pockets are stitched to the door panel and topped off with genuine leather. Leather piping also finishes off the door tops. Wheel arch covers are also bound with the slot for TC seat back brackets (where required). Material is also included to cover the dash & sidescreen compartment, interior piping etc. This attention to detail ensures you get the best interior for your T Type.

Trim Panel Kits are available in a choice of leather panel & vinyl trim, or vinyl panel & vinyl trim.

Seat Assemblies & Cover Kits

Seat Assemblies

Our seat assemblies are the ideal option for those enthusiasts who need new seats but do not want to undertake re-trimming themselves. Our hand crafted leather covers are upholstered on to new timber frames, springs and padding by our specialist trimmers giving a beautifully finished seat assembly. Trimming T Type seats is a complicated job. These assemblies are ready to install, making them a simple and labour saving way to great seats in your T Type.

T Type Hoods

TA's-TB's, and early TC's were originally trimmed in black Duck, a heavy single-ply canvas. Later TC's and TD's were trimmed in the same material but with a Tan duck which was light khaki Tan colour with a greenish cast to it. This material was known for its stiffness and its tendency to fading in bright light. TF's were originally trimmed in a multi-ply canvas material, which was light Tan with a pinkish cast to it. As both of these materials are now obsolete we now supply our weather equipment in our best double duck, which is a 2 ply with a membrane of rubber between layers for waterproofing.

As the listings indicate, we offer a full range of hood and tonneau covers. We do not install the hardware so that you can match the existing stud placement on your car. Although installation instructions are not included with our soft trim, most people find the task quite straight forward. We recommend you seek professional advice if you encounter any installation difficulties.

Hood Frames & Rails

449-240	£226.30	HOOD FRAME	1	TA & TB

Side Screen Covers & Frames

Our side screens duplicate exactly the size and fit of the original and, because they're crafted from the same material, they match our hood kits perfectly. The finishing strips supplied have spoon ends - which is correct for the TD and TF.

For TA-TB & TC owners that are die-hard purists or Concourse enthusiasts we offer a do-it-yourself mitre finishing strip kit. These kits include over-length strips which must be custom mitred to duplicate the original. Side screen frames are supplied in grey primer only, for the original beige paint, see inside back cover.

449-275	£394.80	COVERING KIT, duck, tan	1	TA & TB
449-280	£394.80	COVERING KIT, duck, black	1	TA & TB

---------	---------	-----------------	---	--

Side Screen & Tool Box Felt Kits

Felt sections to allow trimming of side screens and lining of the tool box.

456-448	£62.00	FELT KIT, side screens (Complete car set to re-trim all side screens).	1	
456-468	£63.50	FELT KIT, side screens (Complete car set to re-trim all side screens).	1	
456-420	£46.20	FELT KIT, tool box liner	1	

Threaded Fittings On MG 'T' Types

It's probably a good idea to explain the different thread forms employed on the hardware fitted to your car.

1 - 'Nuffield Metric'

This is the 'oddball' thread/hex head combination to be found on MPJG and XPAG/XPEG engines and gearboxes. When Morris took over the French Hotchkiss Plant at Coventry in 1923, they retained the continental metric tooling (presumably for reasons of cost). To make the situation more palatable for the Whitworth spanner wielding British public, Morris devised imperial hex head sizes for the metric hardware. This is why power unit production up to and including the T Type used such a strange, hybrid range of nuts, bolts and studs.

While the thread angle of the Nuffield metric form is the same as standard ISO metric thread (60°), the pitch is different; although you can hunt around and might find an old metric screw that fits your engine, it really is more worthwhile and less time consuming to purchase your engine hardware from us. An added bonus of taking the latter course is the peace of mind gained from knowing that our hardware is made from the correct material for the task!

2 - Whitworth

Conceived by Sir Joseph Whitworth in 1841, the range of Whitworth forms consists of four distinct types: British Standard Whitworth (BSW), British Standard Fine (BSF), British Standard Pipe (BSP) and British Standard Pipe Tapered (BSPT). On T Types, most body and chassis hardware is BSF, with a sprinkling of BSW. All pipe-work (oil, fuel and brake hydraulics) is BSP.

3 - British Association

A particularly fine thread form originally developed for clock and watch manufacture, "British Association" (BA) hardware is used in electrical components and generally wherever screws smaller than 1/4" BSF are required. Unlike other threads which are identified by their dimensions, the BA sizes range from 0BA to 16BA (the higher the number, the smaller the size). The most common automotive size is 2BA.

4 - Unified

A comparatively recent thread form, "Unified National Fine" (UNF) and "Unified National Coarse" (UNC) are only to be found on the running gear of late TD's & TF's (and just about everything on MGA's, MGB's).

Thread Restorer

For restoring damaged threads on bolts/studs.

- 386-600 THREAD RESTORER, (BSW/BSF) a/r
- 386-610 THREAD RESTORER, (metric) a/r

Paint and colour codes

Here is a list of the colours used on the MGT-Type. The colours are carefully blended to be an exact match to the original paint as used by the factory, but it is worth observing that your car may well have faded from its original colour over the years. For this reason before you start, we recommend that you do a test spray of any aerosol on a piece of old metal or a carefully selected area of the car where a mismatch will not be noticed.

We can supply paint in either aerosol and touch up (TU) format. For engine paint we can also supply paint in brush-on format (BR). The paint we supply is not for spray shop use. The aerosols come in 400ml cans and the brush-on paints are available in 125ml cans with a brush in the cap except for engine and chassis paints, which are supplied in 500ml tins).

Key to paint codes

Saxe Blue	Abingdon Blue	Trafalgar Blue	CCBU37 (TU)
-----------	---------------	----------------	-------------

The colour in the first column on the right are the paint colours applied to MGT-Type models during production (see example above).

- Saxe Blue - Is the factory listed T-Type colour name.
- Abingdon Blue - Is the alternative name.
- Trafalgar Blue - Is the classic car colour name.
- CCBU37 (TU) - Is the Moss paint code.
- (TU) - Means that a touch up option is available.
- (BR) - Means that a brush on option is available.
- Means that the colour was not available at the time of print and to contact Moss.

Saxe Blue is the factory listed T-Type colour name, Abingdon Blue is the alternative name, and Trafalgar Blue is the classic car colour name. It is available from Moss as an aerosol (part no. CCBU37) or as a touch up can (part no. CCBU37TU).

Trim colours

Moss supply trim for the MGT-TA, TB, TC and TF, from complete interior trim kits right through to replacement door trim panels. Moss can supply these in both leather and vinyl materials. The colours available were: Green (TA-TF), Beige (TA-TF), Red (TA-TF), and Tan (TF). Our interior trim kits are all made from original colour vinyls of correct specification mounted on accurately die cut boards. Much time and money has been invested in producing exact replacement parts including the tooling to produce original heat formed patterns. Please see the colour chart below or contact Moss Europe for full details.

	Green (TA-TF)
	Beige (TA-TF)
	Red (TA-TF)
	Tan (TF Only)

MG TA (1936-39)
